How to use PotLight Pro

Changing the battery

Use one alkaline D battery.

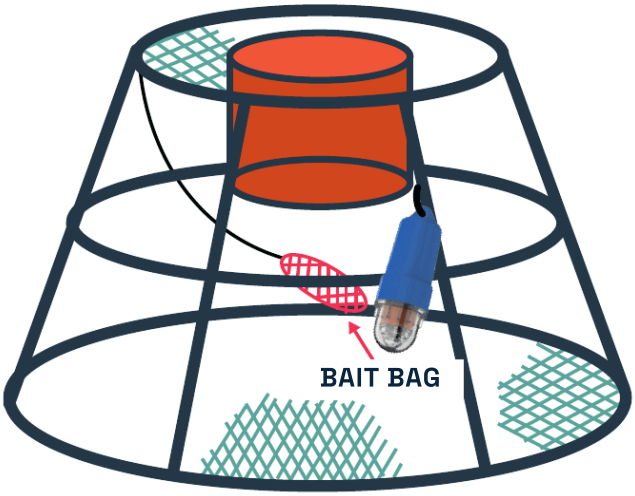

1. Unscrew the cap somewhere clean and dry.
2. Change the battery with the poles the right way round.
3. Check that the thread and seals are clean. Grease the seals if needed and screw the cap on firmly so the seals are pressed together.

Change the battery somewhere clean and dry, so the light lasts longer.

Fitting in the pot

Fix the light inside the pot with a snap clip and split ring or cable ties.

RECOMMENDED USE One light per pot.
