How to use PotLight

Changing the batteries

Use alkaline AA batteries, not lithium.

1. Put a small flat screwdriver (4 mm) in the slot and gently lift off the end cap.

2. Fit new batteries with the poles the right way round. Take care not to loosen the circuit board.

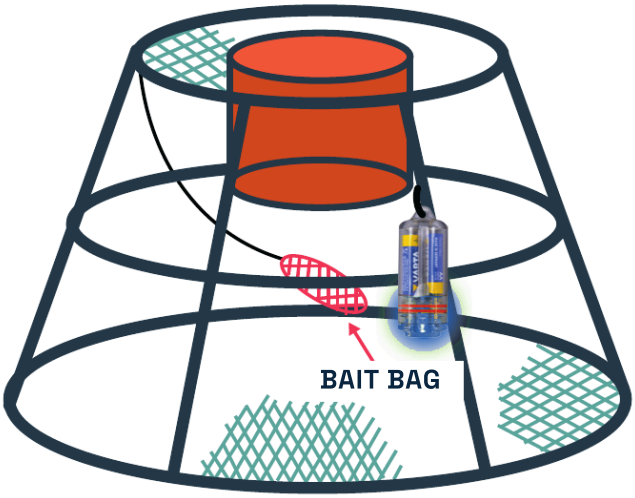

3. Click the end cap back on and check that the light works.

Change batteries somewhere clean and dry, so the light lasts longer.

Fitting in the pot

Fix the light inside the pot, in the centre and close to the bait bag. Use cable ties or a snap clip and split ring.

RECOMMENDED USE One light per pot. Use two lights in large pots.

Technical data

Dimensions	105 × 40 × 22 mm
Weight with batteries	105 g
Weight in water	34 g
Max depth	500 m
Battery	2 x AA alkaline
On and off	Automatic in water
Attachment hole	5.5 mm
